

Codling Moth Home Use Trap and Lure System

Instructions

Thank you for your interest in Alpha Scents insect monitoring systems. Below is a simple guide designed to help first-time users of Alpha Scents' home-use products. Follow the instructions below to learn how to assemble, and deploy, your new trap system.

Trap for: Codling Moth (*Cydia pomonella*)

Parts:

- Red Paper Delta Trap x1

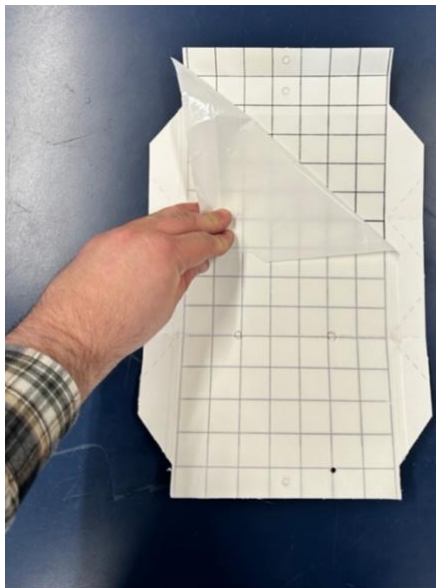

- Trap Hanging Wire x1
- Codling Moth Long-Life Lure (CYPO08) x1

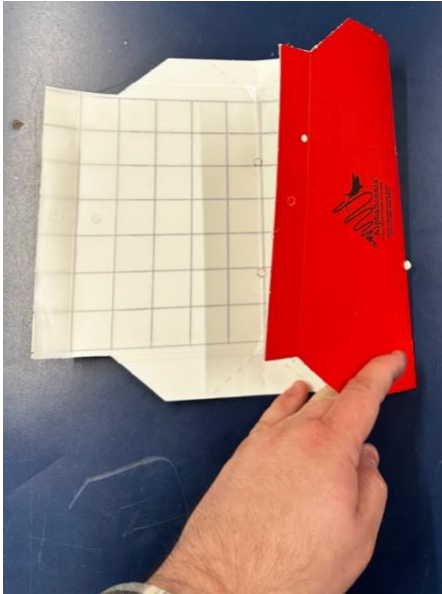

Instructions:

1. Place the delta trap face (**Red Side!**) down and remove the protective wax paper covering.

2. Fold along pre-creased lines to assemble into a prism shape.

3. Fold longer endpiece over shorter endpiece. Attach using staples (recommended) or other strong fixing material.

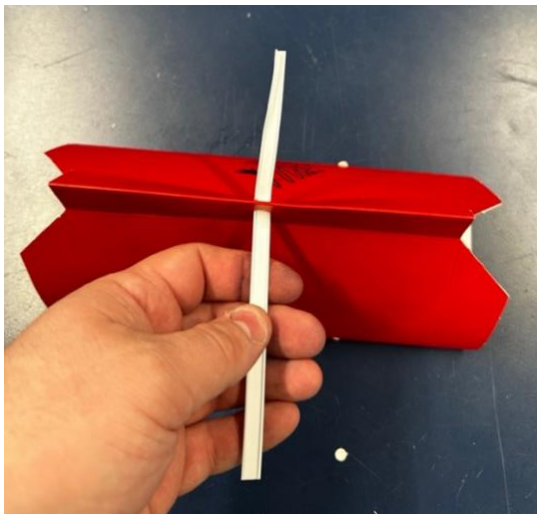

4. Fold the perforated edges inward, leave one side open to add lure.

5. Remove the lure from protective packet.

6. Place lure in center of sticky card.

7. Thread trap hanging wire through the central hole.

8. Deploy trap in tree, 1-2 traps per tree, as high in the tree canopy as possible.

Thank you for using Alpha Scents traps and lures for your pest control needs!
